FOR FARMERS  BY FARMERS

# WINGED DITCHER

FULLY ADJUSTABLE

With adjustments for wing width, wing angle, and point angle, you can easily set your winged ditcher to be as aggressive as you need.

The hard-surfaced tillage point is designed to prevent slabbing in clay-type soils, and it's held in place by two bolts for quick, easy replacement.

Single clamps are made for 7" or 7" x 5" bars, and the ditcher wings are made of sturdy 1/4" plate with hard surfacing on the leading edges.

A kit is available for B&H. This leaves the original B&H shank in place, but allows for mounting of a second shank (1" x 3" - sold separately) behind the original shank.

 **SCHLAGEL**

Our products are simple, yet stalwart, and they're built and tested to ensure they'll be in it for the long haul. Visit our website to locate a trusted Schlagel dealer near you. Have questions? Just give us a call!
