

WINGED DITCHER

WINGED DITCHER

FULLY ADJUSTABLE

With adjustments for wing width, wing angle, and point angle, you can easily set your winged ditcher to be as aggressive as you need.

The hard-surfaced tillage point is designed to prevent slabbing in clay-type soils, and it's held in place by two bolts for quick, easy replacement.

Single clamps are made for 7" or 7"x 5" bars, and the ditcher wings are made of sturdy 1/4" plate with hard surfacing on the leading edges.

A kit is available for B&H. This leaves the original B&H shank in place, but allows for mounting of a second shank (1" x 3" - sold separately) behind the original shank.

 **SCHLAGEL**

Our products are simple, yet stalwart, and they're built and tested to ensure they'll be in it for the long haul.
